### PostgreSQL: Manuals

mysql\_query() manual entry actually correctly states it will use the last link opened by mysql\_connect() by default. Thus if you have 2 connections you will need to specify the connection when calling mysql\_query or issue the connect again to ensure the 1st database becomes the default, simply using mysql\_select\_db will not make the 1st database the default for subsequent calls to mysql\_query.

### PHP: mysql\_select\_db - Manual

This is an index of all supported configuration settings based on the DefaultSettings.php file.. Never edit DefaultSettings.php; copy appropriate lines to LocalSettings.php instead and amend them as appropriate.. If you can't find a configuration setting here, see if it is defined in DefaultSettings.php.The variable should have some documentation there.

### MySQL :: MySQL Documentation

This will allow data in Oracle DB to be queried directly from MariaDB like database link. Note : As of today, CONNECT engine only allows SELECT operation to remote dbase. The engine still under heavy development and will support other operation such as INSERT , UPDATE and DELETE in the future.

**HOW-TO : Install Mariadb CONNECT engine with Oracle 12c ...**

If a second call is made to `mysql_connect()` with the same arguments, no new link will be established, but instead, the link identifier of the already opened link will be returned. The `new_link` parameter modifies this behavior and makes `mysql_connect()` always open a new link, even if `mysql_connect()` was called before with the same parameters.
