Eudell's Auto Service Business Liquidation Auction

The 230-cubic-inch engine came in mid-1960s passenger cars like the Chevy II, Camaro, Chevelle, and some full-size cars as well. It was rated at 140 horsepower with a one-barrel and 155 horsepower with a two-barrel carburetor and 8.5:1 compression. All early Chevy six engines place the intake and exhaust manifolds on the driver side of the engine.
