There have been numerous attempts to create compound indices that combine measures of richness and abundance. Foremost among these are the Shannon's diversity (H') and Simpson's diversity (D 1) indices (Table (Table1), 1), which differ in their theoretical foundation and interpretation (Magurran 2004). H' has its foundations in information theory and represents the uncertainty about the ...

Molecular clock analysis of phylogenetic data also indicates when the C 4 pathway arose. The oldest C 4 lineage estimated by molecular clock methods is the grass subfamily Chloridoideae, which is approximately 30–35 million years old (Figure 14(a)). The oldest estimated eudicot lineage is the Chenopodiaceae subfamily Caryoxylonae, estimated to have arisen about 25 mya.
