Question 693621: How many liters of each of 20% acid solution and 45% acid solution must be used to produce 50 liters of a 40% acid solution?

Answer by josmiceli(19441) (Show Source):

SOLUTION: How many liters of each of 20% acid solution and ...

Although your kidneys can excrete up to 20–28 liters (4.5–6 gallons) of water per day, they can only process 800–1,000 ml (27–34 ounces) of water per hour .

Drinking 3 Liters of Water per Day: Benefits and Downsides

There are many different opinions on how much water you should be drinking every day. Health authorities commonly recommend eight 8-ounce glasses, which equals about 2 liters, or half a gallon.

How Much Water Should You Drink Per Day?

The Molarity #M# is calculated by the equation comparing moles of solute to liters of solution . #M=(mol)/L# For this question we are given the Molarity 0.88M. We are told the solute is a 25.2 gram sample of LiF, Lithium Fluoride. We can convert the mass of LiF to moles by dividing by the molar mass of LiF. Li = 6.94 F = 19.0. LiF = 25.94 g/mole

How many liters of a .88 M solution can be made with 25.5 ...

In the metric system, 1000mL makes 1 liter and 250mL makes one metric cup. With this knowledge, calculating how many cups in one liter is easy as $1000/250=4$. This implies that in the metric system a liter can accommodate four cups. For the imperial system of measurement, 1 liter equals 1000mL and equals 35.1951 imperial fluid ounces.

How Many Cups In A Liter? - The Kitchen Daddy

How many liters of a 5.0% (m/v) glucose solution would you take to obtain 75 g glucose? report answer in liters (L glucose solution) Any help would be greatly appreciated! Thanks! Answer Save. 1 Answer. Relevance. Mike W. Lv 6. 1 decade ago. Favorite Answer. 5% w/v means 5 g in 100 mL, or 50 g in 1 L.
