MA Advanced Macroeconomics | Karl Whelan

A macroeconomic model is an analytical tool designed to describe the operation of the problems of economy of a country or a region. These models are usually designed to examine the comparative statics and dynamics of aggregate quantities such as the total amount of goods and services produced, total income earned, the level of employment of productive resources, and the level of prices.

We argue that the government-spending multiplier can be much larger than one when the zero lower bound on the nominal interest rate binds. The larger the fraction of government spending that occurs while the nominal interest rate is zero, the larger the value of the multiplier. After providing intuition for these results, we investigate the size of the multiplier in a dynamic, stochastic ...

La estanflación (calco del inglés: stagflation), palabra compuesta a partir de estancamiento e inflación, indica el momento o coyuntura económica en que, dentro de una situación inflacionaria, se produce un estancamiento de la economía y el ritmo de la inflación no cede.. Estanflación es un término que fue acuñado en 1965 por el entonces ministro de Finanzas británico, Ian McLeod ...

Estanflación - Wikipedia, la enciclopedia libre

La loi d'Okun, en économie, a été proposée par Arthur Okun en 1962 [1].Elle décrit une relation linéaire empirique entre le taux de croissance (du PIB) et la variation du taux de chômage.En dessous d'un certain seuil de croissance, le chômage augmente ; au-dessus de ce seuil, il diminue, à élasticité constante.. La loi d'Okun constitue « un lien de toute première importance entre ...
