Spray And **Engine Spray and Combustion Processes ...**

The spray combustion in a diesel internal combustion engine was simulated by Vujanovic et al. [21] using a coupled Eulerian-Eulerian and Eulerian-Lagrangian method. The Eulerian-Eulerian (EE) method is used for spray modeling, including the fuel jet disintegration and droplet evaporation

Download Ebook Modeling Engine Spray And Combustion Processes

been developed to improve the prediction of diesel engine combustion and emissions using the KIVA-II CFD code. The accuracy of modeling the spray breakup process has been improved by the inclusion of Rayleigh-Taylor accelerative instabilities, which are calculated simultaneously with a Kelvin-Helmholtz wave model.
