We saw earlier that the distribution of self-esteem scores is strongly skewed toward the high end of the scale, with roughly one third of White students, and even more African-American students, in the top category of Figure 1 (which consisted of the four highest scores: 5.0, 4.875, 4.75, and 4.625 on the full-scale self-esteem measure).

Adolescent Self-Esteem: Differences by Race/Ethnicity, Gender, and Age

Such self-denigration contributes to dislike for school, to truancy, and even to delinquency (Berends, 1995; Gold and Mann, 1972; Kaplan and Johnson, 1991). Reviews of the effects of tracking in secondary school reach four general conclusions, all suggesting that the impact is largely negative for students in low tracks (see Oakes, 1987).

Agnew (1985) argues that delinquency is most common among those experiencing negative life events, such as divorce or financial problems (Hagen & Daigle, 2018). He also argues that delinquency comes from an inability to avoid painful environments - such as a school environment where there are interaction problems with teachers.
