A simple equation, Pythagorean Theorem states that the square of the hypotenuse (the side opposite to the right angle triangle) is equal to the sum of the other two sides. Following is how the Pythagorean equation is written:  $a^2 + b^2 = c^2$ . In the aforementioned equation,  $c$  is the length of the hypotenuse while the length of the other two sides of the triangle are represented by  $b$  and  $a$ .
