JASIC is a welding and cutting machine manufacturer founded in 2005. Our products have been used in some of the most ambitious projects in modern history, such as the Beijing Bird Nest Stadium and the Shenzhen Metro. . . . this is the 4th consecutive High and New-Tech Enterprise certificate that JASIC has received, which fully demonstrates ...

JASIC - Passionate About Your Welding

The comprehensive body of knowledge that has built up with respect to the friction stir welding (FSW) of aluminium alloys since the technique was invented in 1991 is reviewed. Basic temper designations applicable to heat-treatable Al alloys are tabulated. Marine, aerospace, rail and automotive applications are discussed. Friction stir processing and friction stir spot welding process variants ...

Friction stir welding of aluminium alloys - TWI

The purpose of this e-learning course is to provide the participant with the tools to perform various MSA applications within their organizations. The course is presented in several, self-contained modules to effectively drive the principles of MSA while enabling the participant to immediately tie the principles to their applications.

(MSA) Measurement System Analysis | AIAG

Explores the medium of sculpture through the principles of three-dimensional design & the concepts that drive developments in contemporary art. Projects may include welding, mold making, & the use of wood working tools, as well as the use of sculpture as costume, performance, environment, or kinetic form.

Air carbon arc cutting, also referred to as metal arc gouging, and previously as air arc cutting, is an arc cutting process where metal is cut and melted by the heat of a carbon arc. Molten metal is then removed by a blast of air. It employs a consumable carbon or graphite electrode to melt the material, which is then blown away by an air jet.

Air carbon arc cutting - Wikipedia
